Tacho4Safe

Manual tachograph download device

Tacho4Safe

Manual tachograph
Download device

What does Tacho4Safe offer?

Tacho4Safe is the latest generation of manual Tachograph and Driver card download device, which stores the downloaded files in the cloud where it can be instantly accessed from every platform connected to the internet.

The screenshot shows the TachoSAFE web interface for SVT Electronics. The 'UPLOADED FILES' section is active, displaying a table of driver card files. The table has columns for Upload date, Ident.Number, First Name, Last Name, First activity, Last activity, Download period length, and File name. Two files are listed: one for Alex Driver uploaded on August 30, 2018, and one for Paul Trucker uploaded on August 28, 2018.

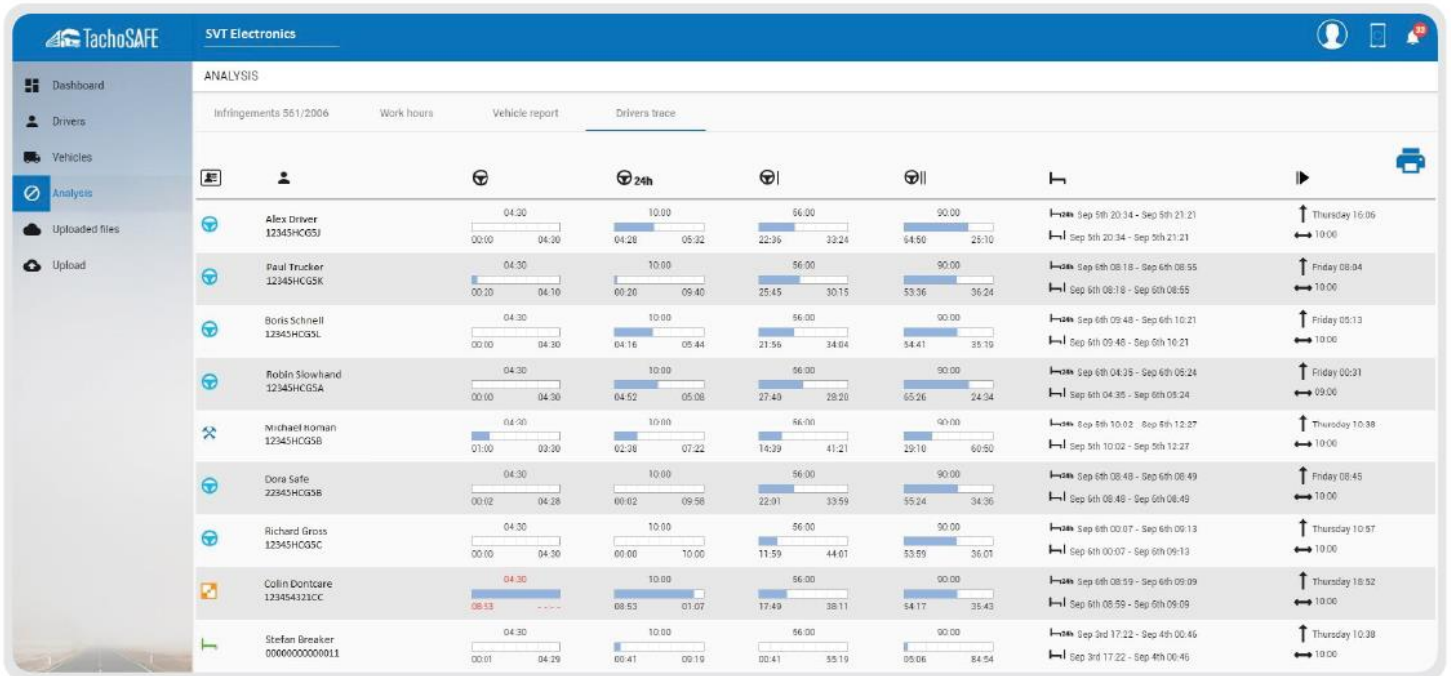

Upload date	Ident.Number	First Name	Last Name	First activity	Last activity	Download period length	File name
August 30, 2018	12345HCG5J	Alex	Driver	January 1, 2017	August 30, 2018	400+ days	EU_12345HCG5J_Driver_Alex
August 28, 2018	12345HCG5L	Paul	Trucker	January 15, 2015	April 12, 2018	1183 day(s)	EU_12345HCG5L_Trucker_Pau

Functionalities of the system:

- Data is stored in the cloud, resulting in unlimited downloads
- Tacho4Safe has a rechargeable battery (charge over USB)
- All the settings are determined automatically by the system resulting in compliant files
- Multiple language support

Additional features containing the package:

- The analysis of the downloaded files can be done on the *Tachosafe* web portal
- Configuration of download period is automatic
- Data can be send automatically to own computer or server and be imported into various software (like TIS-Web, Idha-online or TachoPlus.

Smartphone application

New feature!
Driver card and Tachograph
downloads can be monitored
from your mobile device!

You can also get notifications
about the overdue downloads.

All this conveniently at the
tips of your fingers!
