

## 1. Legal basis of One Minute Rule

---

From 1st October 2011 a new law concerning recording of driver's activity using a digital tachograph came into force. EU Regulations 1266/2009/EC brings so-called "One Minute Rule" that allow use a dominant activity rule. If the vehicle is moving for 29 seconds and remains stationary for the next 31 seconds, according to this regulations entire minute will be recorded as a rest time. If situation is reversed and a vehicle is in motion for 31 seconds, tachograph will record full minute as a driving time. New way of recording time will help you save valuable minutes for traffic jams, short moves f.e.g. at customs clearance, waiting in a queue at the board.

## 2. How does it work?

---

Please see attached dvd with a conductor video

## 3. Installation Instruction

---

Tachotimer is compatible with Tachographs:

**Continental DTCO 1381**  
from 1.4 version and higher

**Stoneridge SE5000**  
from 7.3 version and higher

**Efas 4**

## 4. Mounting Instruction

---

**Red** - (+) 12/24 supply

**Brown** - (-) masa

**Blue** - V-Imp, B connector (impulse signal) slot B6 or B7
